UNITED STATES EXPORTS OF DOMESTIC AND FOREIGN MERCHANDISE
(Tabulation of Monthly BC Summary Records)
COUNTRY OF DESTINATION BY SUBGROUP BY COMMODITY
(Domestic and Foreign Merchandise Shown Separately)

Calendar Year 1963

COVERAGE: Export statistics include government as well as non-government shipments to foreign countries. The export statistics, therefore, include Department of Defense Military Assistance Program—Grant-Aid shipments, Mutual Security Program economic assistance shipments, and shipments of agricultural commodities under P. L. 480 (The Trade Development and Assistance Act of 1954, as amended) and related laws. Shipments to United States armed forces and diplomatic missions abroad for their own use are not included in export statistics. Merchandise shipped in-transit through the United States between foreign countries is also excluded. United States trade with Puerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries, when documented as such through United States Customs, is included as a part of the United States export trade. Values, in general, are based on selling price, and include transportation and other costs to the United States port of exportation. Further information is contained in the "General Explanation" in foreword of Report No. FT 420. For complete statement, see the foreword to Foreign Commerce and Navigation of the United States.

The export statistics presented in this tabulation are compiled in accordance with Schedule B commodity classifications and reflect fully compiled data for shipments individually valued $500 and over combined with estimated data for shipments valued $100-$499 based on a 10 percent sample of such shipments to Canada and a 50 percent sample of such shipments to other countries. For a further description of the sampling procedure and information regarding the reliability of the data, see the foreword of Report No. FT 410. (Note: The figures shown in the "Number in sample" column for the continent of North America and for the over-all total represent the number in the 10 percent sample for shipments to Canada combined with the number in the 50 percent sample for shipments to other countries. These totals have been provided for possible use in connection with any studies which the Bureau of the Census may wish to make. It is not foreseen that these sample card counts combining the totals from the two different sample ratios will have any utility for users of the statistics.)

For security reasons, detailed commodity and country of destination data are not shown in export statistics for certain selected commodities, referred to as Special Category commodities. Therefore, the country totals shown in this tabulation represent exports to the respective countries exclusive of Special Category commodities. Summarized information on exports of Special Category commodities is shown at the end of this tabulation with the country code 899. See the January 1961 issue of Report No. FT 410 for a list of Special Category commodities.

The data shown for individual Schedule B commodity numbers exclude shipments valued at less than $100 but information on such shipments to each country is estimated and presented under Schedule B commodity number 99920. See the June 1953 issue of Foreign Trade Statistics Notes for a description of the method used to estimate the dollar value of such shipments.
